

All Measurements should be taken in straight lines with a tape measure, yard stick or stager gauge and photos of these must accompany any seat order.

1. Eye port – Sit up straight, looking forward measure from the dip in your shoulder to the center of the eye.
2. Shoulder Height – Again sit up straight, hold your arms out in front of you like driving. Measure from hard surface you are sitting on to where your shoulders and neck meet.
3. Shoulder Width – With your arms out in front of you like you are driving, measure from outer part of shoulder to outer part of opposite shoulder.
4. Waist Width – Measure along the back at the bottom of your rib cage.
5. Hip Width – Measure widest part of the hips below the belt line.
